

FAQ's for MOBILE FOOD UNITS and PUSH CARTS

I want to permit a mobile food unit/push cart in Guilford County what do I need to do?

All mobile food units/pushcarts (pc) will need to work out of a permitted facility. A facility can be a restaurant or a commissary that is permitted by the Guilford County Department of Environmental Health and one that has the capacity to accommodate additional food preparation and storage. Working out of your home or a non –permitted facility like a church is **not** allowed.

I want to buy a mobile food unit/pushcart what are the requirements?

The requirements for a mobile food unit/pc are very similar to restaurants. The equipment must be of commercial quality and certified/classified for sanitation as required by NC Food Code. The equipment that is required is based on the menu. All mobile food units and push carts that want to be permitted in Guilford County will need to go through plan review. The plan review application is available on our website <http://eh.myguilford.com>

I have a permitted mobile food unit/pushcart and I want to operate in Guilford County what do I need to do?

Prior to operating in any county the pushcart or mobile food unit permit holder shall provide to the regulatory authority (health department) in each county that they want to sell food in a proposed list of locations, times and dates when they will operate. The list must be kept current. If an operator is selling food and has not provided information to the regulatory authority, they are in violation of their permit and may have their permit suspended. To provide a list of operational locations, times, and dates in Guilford County, please contact us at mobilefood@myguilford.com or 336-641-3771.

Do you know who has a mobile food unit/push cart for sale?

Guilford County can not endorse any manufacturer but here are a few that have produced or modified carts that we have permitted.
