ELIMINATING DISPARITIES.
ENDING INFANT DEATHS.
EMPOWERING FAMILIES.

Theory of Change Overview

The Issue- The infant mortality rate in Guilford County is one of the highest in North Carolina. For several decades, Guilford County's infant mortality rates, and other leading causes of infant death, including late or no prenatal care, pre-term birth, and low birthweight rates remain higher than the state and national rates, with glaring racial disparities. These rates and racial disparities have had minimal fluctuation over the many years of efforts to address the issue that did not explicitly address the racial inequities.

The Opportunity and Our Goals- Using a racial equity lens, Every Baby Guilford is building a radically inclusive collective action movement, that builds collaborative solutions that centers the community (people, parents, children, and families) and works together with community members, frontline caregivers, health care systems civic and government leaders, faith-based organizations, and city and county officials) so that we can disrupt these longstanding health outcomes and racial disparities in Guilford County.

In five years, we collectively will ensure more Black babies are born healthy and live to celebrate their first birthday, because when we create a healthy Guilford County for Black babies then we create a healthy Guilford County for all of us. Our goals and priorities will center birthing/pregnant people and infant with an explicit aim to address the stark racial inequities in which 37 Black babies did not live to see their first birthday compared to 14 white babies in 2019. We intend to improve health outcomes by decreasing racial disparities by 50% in select infant mortality variables:

- % of women reporting late or no prenatal care
- % of reported preterm births
- % of low birthweight (<2500 grams) and very low birthweight infants (<1500 grams)

Collective Action Partners Identified (this list is continuing to grow through this process)

MOST IMPORTANT PARTNERS: Guilford County residents, a diverse group that includes parents and families most impacted by high infant mortality rates and racial disparities.

*Guilford County Organizations and Institutions that influence maternal and infant health in GC
(In ABC order)*

College and Universities in Guilford County

- Students
- Academic Programs
- Community-Focused Initiatives

Foundations serving Guilford County:

- The Cemala Foundation
- Cone Health Foundation
- The Foundation for Healthy High Point
- Greensboro Community Foundation of Greater Greensboro

Strategies	Interventions
<p>Advance health equity by addressing systemic racism and implicit bias within the continuum of care for maternal and infant health</p>	<p>Collective Action Together by Engaging with Coalition- advisory groups, action teams, core-partnership.</p> <p>Co-design a Community "Checklist" that is developed, shared, and promotes self-advocacy. Building trust between patients and providers</p>
<p>Center community with radically inclusive community engagement that creates collaborative solutions</p>	<p>Education and awareness campaign- messaging across the continuum of care- pre-pregnancy/general health, prenatal, postpartum, well child development, etc. (incl. toolkits for providers, parents, and other community members to reach more people)</p> <p>Community Storytelling Project- engage parents, families, and community (leverage existing groups through partnerships) to amplify the experiences of community members, create collaborative solutions, and drive health improvements. (targeted engagement with Black community partnerships)</p>
<p>Strengthen the continuum of care of reproductive life planning – from preconception to prenatal, to interconception care for equitable access to quality care</p>	<p>Community Circles/Groups (including parents, family members, and leverage existing groups through partnerships). A space for the community to support families, strengthen connections, share learnings, and action planning/advocacy. (targeted engagement with Black community partnerships)</p>
<p>Promote infant wellness and positive child development</p>	<p>Promote healthcare access & referrals for care and supports (leverage existing partnerships and local navigation services)</p> <p>Collective advocacy to address barriers to healthcare (i.e. Medicaid expansion, or sliding scales for people who don't qualify)</p>
